

## Cooperation with Bolidt Special Team

In addition to the distinctive structures including the Fortis building and the Provincial Hall, the Rijnsweerd office complex in Utrecht can now boast another characteristic business building. William Properties of Rotterdam commissioned the development of a new commercial property that will for the greater part be leased by CMS Derks Star Busmann and PriceWaterhouseCoopers.

The building has been designed by the New York based Dutch architect [Rijk Rietveld](#) and the interior design was done by architectural firm [Odeon](#) from Eindhoven.

The enthusiasm of both the interior designer and the users has led to a design, which includes shadow effects. The '[Bolidt Special Team](#)' was called in to help realize the specific [design](#). This team knows how to find a solution to the most innovative wishes. The close cooperation between the interior designer and the Bolidt Special Team has resulted in a fantastic floor.
