

News from the UK

Bolidt is operating worldwide and regularly sets up interesting collaborations. Bolidt's partner in the UK has yet again added some nice new projects.

BULO

Already since 1973 BULO represents qualitative office furniture. The designs are a result of cooperation with architects worldwide, for example from France, Holland and Belgium. A few years back BULO launched a new house style, using the slogan "Love your office" as a starting point. So there is no way BULO's own [offices](#) can lag behind! With the Bolidtop® 525 [design flooring](#) of Bolidt the office in London has every right to come into prominence. A simple, but stylish matt, silk finish that shows up the furniture well. The result of this creativity? BULO loves its office.

Queen Mary University

The Queen Mary University in London has proven to be a star. The 'Times Higher Education' ranked the [university](#) 13th in the RAE (Research Assessment Exercise) 2008. 'The Guardian' even assigned the 11th place. This means the university is the biggest star among the research-intensive institutions, up 35 places. Bolidt therefore considered it an honour to install a Bolidtop® FiftyFifty flooring system at the Biochemistry department during a renovation, using an especially developed yellow orange colour that architect bureau Hawkins/Brown made up itself by combining two NCS colours from the Bolidtop® 525 series. This subtle colour blend gives the floor a marble look, with the same effect as polished concrete. A university on its way to even bigger stars!

Vanilla Club

There's at least one in every city: the trendy, popular progressive club that amuses and relaxes dozens of people every night, but that is also an ideal location for social events. 'Vanilla Club' in London wants to bring 'excellence' to its customers in both service and design and it makes an excellent location for private and business related parties and events. Thanks to Vanilla Club's white interior, which serves as neutral background, it is possible to change the ambiance of the club in less than no time by using the varied coloured lighting. A romantic red glow, a refreshing green environment or a mixture of colours, it is all possible and in addition very useful for different occasions. The seamless, snow white floor of Vanilla Club is the work of Bolidt. This [Bolidtop® 525](#) finish is a perfect match to the rest of the interior and extremely functional in combination with the colourful atmospheric lighting.

News from the UK

DKNY

"Everything I do is a matter of heart, body and soul. For me, designing is an expression of who I am as a woman, with all the complications, feelings and emotions." Not just some casual words of Donna Karan, who even calls here female instincts the reason of her success. The founder and main designer of the famous fashion brand DKNY (Donna Karan New York) is known worldwide from among other things her versatile clothing line, lifestyle products and accessories. In one of her New York [shops](#) of the same name Bolidt applied a sensational Bolidtop Sensation, completely harmonious with the special and specific DKNY interior.

Oxford University

This English university has been a leading educational institution for centuries. Oxford has produced 25 British prime ministers and over 30 foreign presidents and prime ministers. Among the accomplishments of Oxford graduates are the invention of the World Wide Web, significant contributions to the [treatment](#) of malaria and the liberalisation of trade in India in the early 1990s. It is therefore fair to say that the university does not lack the brains to choose the right flooring for its Biochemistry Department. After due consideration, they decided on the Bolidtop[®] 525 system from Bolidt! For good reasons – and with conviction – too. The floor has to be able to cope with a lot of foot traffic from one space to another and the Bolidtop[®] 525 flooring system is extremely resistant to high stress loads. Its crack-bridging, sound-damping and shock-resistant qualities also had a crucial influence on the choice of this system. Bolidt may not have studied at Oxford, but is a master when it comes to flooring.
